Plot summary

Swedish
Film Institute

The Swedish Film Database

Ann Sofi and Andreas are a couple of Swedes studying art in Romania. One afternoon they are given six large live fish by their neighbour. As neither of them dare kill the fish, they decide to freeze them. The next day they discover that the fish have survived. Andreas takes this as a sign and takes it upon himself to release the fish into a local lake. **6 Big Fish** is a film about extreme poverty, maladjustment and the paradoxical nature of hope.
